ENGINEERING ROBControllerVision

Build a mental model of ROBControllerVision's Swift 6 architecture: authenticated sessions, explicit control ownership, spatial input, independent arm leases, three bounded H.264 feeds, immersive 360 presentation, speech, and testing. The focus is a responsive visionOS controller whose media path cannot outrank motion safety.

INSIDE THIS BOOK

- Swift 6 and authenticated sessions
- Spatial input and independent arm leases
- Bounded video, speech, and immersive 360
